PROFESSIONAL SUMMARY

B.E. in Computer Science & Engineering graduate with hands-on experience designing, developing, and deploying full-stack web applications and AI-powered solutions. Proficient in **React, Node.js, Express.js, MongoDB, Python, and FastAPI**, with experience building multi-role platforms, examination management systems, RESTful APIs, and RAG-based AI applications. Skilled in JWT authentication, role-based access control, responsive UI development, and software engineering best practices. Passionate about building scalable, user-centric applications and continuously learning modern technologies across Full-Stack, Backend, Frontend, and AI/GenAI development.

EDUCATION

Canara Engineering College

Bachelor of Engineering in Computer Science
CGPA: 8.14

Mangalore, India

2022 – 2026

Sri Venkataramana Pre-University College

Pre-University (PCMC)
Percentage: 76.80%

Kundapura, Karnataka

2020 – 2022

Don Bosco School

S.S.L.C
Percentage: 56.57%

Trasi, Karnataka

2019 – 2020

TECHNICAL SKILLS

- **Languages:** Java, JavaScript, Python
- **Frontend:** HTML, CSS, Tailwind CSS
- **Database:** MySQL
- **Soft Skills:** Communication, Adaptability, Teamwork

EXPERIENCE

Web Developer Intern

SoVir Technologies LLP

Aug 2025 – Jan 2026

Udupi, Karnataka

- * Developed and maintained the company's official website using React, Node.js, Express.js, and MongoDB.
- * Designed and implemented responsive user interfaces using React and Tailwind CSS.
- * Built secure RESTful APIs and integrated MongoDB for data management and business operations.
- * Implemented JWT-based authentication and role-based access control for administrators and users.
- * Developed an admin dashboard to manage training programs, inquiries, and customer requests.
- * Integrated automated email notifications using Nodemailer to streamline communication workflows.

- * Collaborated with stakeholders to gather requirements and deliver business-focused solutions.

PROJECTS

Enterprise Agentic AI Platform | *Python, FastAPI, Ollama, MongoDB, Docker* | [GitHub Repository](#)

- * Developed an agentic AI backend with goal decomposition, tool routing, and plan execution using local LLM (LLaMA3) via AI-assisted development.
- * Implemented RAG pipeline with sentence-transformer embeddings and vector similarity search for context-aware responses.
- * Integrated enterprise patterns: API key auth, input validation, circuit breaker, retry policies, and structured logging.
- * Containerized with Docker (multi-stage build) with health/readiness probes and Prometheus observability.

Web Portal for Sovir Technologies | *Live: <https://www.sovirtechnologies.in/>* | [GitHub Repository](#)

- * Developed a full-stack web application serving as the company's digital front and admin management system.
- * Built a secure RESTful API with Node.js, Express.js, and MongoDB for backend operations.
- * Implemented JWT-based dual authentication for users and administrators.
- * Designed a responsive frontend using React and Tailwind CSS for seamless multi-device access.
- * Developed an admin dashboard to manage training programs, service inquiries, and client requests.
- * Integrated automated email notifications via Nodemailer for instant admin alerts on new submissions.

Sovir Full-Stack Training Platform | *Live: <https://training.sovirtechnologies.in/>* | [GitHub Repository](#)

- * Architected and delivered a production-grade training platform for language (German, English, Japanese) and industrial courses (PLC, SCADA, Industry 4.0) with role-based dashboards, 19 data models, and 14 RESTful APIs.
- * Engineered secure authentication using JWT sessions, Google OAuth 2.0 SSO, OTP email verification (Nodemailer), and forgot/reset flows with enforced RBAC across 33+ frontend routes.
- * Developed an end-to-end course management system featuring batch scheduling (Google Calendar integration), admin-approved enrollments, attendance tracking, assignment submissions, and real-time trainer dashboards.
- * Built and deployed a responsive SPA with React 19, Vite 7, TailwindCSS 4, and Framer Motion on Firebase Hosting, backed by a Helmet-secured Express 5 API with Multer uploads and class-validator DTO-based contracts.

Examination Portal | *Live: <https://examportal.sovirakademie.com/>* | [GitHub Repository](#)

- * Engineered a full-stack examination portal enabling end-to-end online exam management for institutions, trainers, and candidates.
- * Architected secure RESTful APIs with JWT-based authentication, role-based access control, and audit logging.
- * Built an admin dashboard for managing institutions, batches, registrations, paper assignments, reviews, and analytics.
- * Developed a dynamic exam engine with timed assessments, auto-submission, response tracking, and result generation.
- * Designed a responsive multi-role frontend with dedicated dashboards for admins, trainers, and candidates.
